In London, when the sun was low, And William Wilson dressed to go To that big banquet, donderknow, His feelings surged tumultuously.

But England saw another sight; Her furnace fires were burning bright, And mills were running day and night, Thanks to Free-trade Democracy.

YESTERDAY'S SESSION OF THE GRAND LODGE AT PARIS.

A Royal Welcome—Business of the Session—Results of the Year's Work—How the Maysville Boys Bob Up.

His Honor Mayor Hinton and Hon. E. M. Dickson welcomed the Grand Lodge to Bourbon's capital, the latter in an eloquent address.

Past Grand Master W. W. Morris responded on behalf of the Grand Lodge, and agreed to accept the hospitalities so generously and so gracefully tendered—Bourbon spring water included.

KNOCKED OUT

Are Mr. Simonson's Lawyers On Every Question.

Flemingsburg Gazette.

Some very important motions in the Simonson divorce suit came up before Judge Harbeson last Friday and Saturday, and resulted in Mr. Simonson's lawyers being knocked out on every question under argument. Not a single point was decided in their favor. Zack Phelps of Louisville and E. L. Worthington of Maysville were Mr. Simonson's lawyers from a distance, and it seems they took our attorneys for hayseeds, and were fooled.

A motion was made by the wife's attorneys asking an allowance of \$300 per month and \$1,000 for expenses pending trial. The court allowed \$175 per month from the time the suit was filed until the next January term of court, and \$500 for suit money, which he directed to be placed in the hands of a Trustee. Mr. Simonson's lawyers then asked that the injunction which was granted some time ago, giving the wife's suit here priority of trial over the husband's suit at Louisville, be dissolved. This was refused.

At the Circuit Clerk's office there are several large volumes of depositions, filed by the husband's attorneys, containing some of the most sensational and racy testimony ever put on record there. In them there is material enough for a dozen cent novels, and the old bachelors, middle-aged bachelors and young bachelors—besides the married men—have been climbing over the top of one another in their efforts to get to read them. A motion was made by the wife's attorneys to have this testimony squashed on some technicality, which was done. This will necessitate taking them all over again. All the questions will be taken to the Court of Appeals, except the last.

ROYALLY ENTERTAINED.

Mrs. H. Duke Watson's Reception a Grand Success Last Evening.

Those who were fortunate enough to have an invitation to the home of Mr. and Mrs. H. Duke Watson last evening to attend the reception given in honor of Miss Evaline Eastland of Danville, Miss Lulu Thompson of Paris and Miss Lizzie Jefferson of Lexington, Miss Jessie Peed's guests, were well repaid for their loss of repose.

Some twelve couple responded to the invitations, and they thoroughly enjoyed themselves.

There was music to dance by from the Maysville Orchestra, and those who were interested in dancing took advantage of the sweet strains and tripped the light fantastic until the music ceased.

At midnight the guests were invited into the dining-room, and there they were introduced to a regular old-time repast, which they also enjoyed.

It was early this morning before they could find time to leave the hospitable home and content themselves with the short time they had been there.

Mrs. Watson's two daughters, Miss Maggie Duke and Miss Willa, helped to receive, at which they are no strangers by any means.

Tonight the same party will pass away a few hours very pleasantly with Mr. and Mrs. Joseph D. Peed of East Third street, where another good time awaits them.

RIVER AND RAIL.

What is Being Done on Our Two Great Highways.

River continues to decline here, with no prospects of a rise anyways soon.

The steamer Natchez went into New Orleans Monday with 2,800 bales of cotton.

There are large quantities of coal tied up in the pools at Pittsburgh awaiting another rise.

The Big Sandy river is the next thing to dried up. Navigation has been suspended for some time.

The river is stationary at headwaters, with a light rain Monday, which will probably keep the river at its present stage there for a day or two.

The Louisville Division of the Pennsylvania is moving large quantities of tobacco from Louisville North and East, and business has improved considerably on this account.

The lumber for the construction of the new cabin on the Silver Wave was shipped from Cincinnati on the Carrollton yesterday from Strader avenue to Augusta, the Silver Wave being repaired and remodeled at that point.

The Pennsylvania shops are now running on full time at all points and the rolling stock is being placed in good condition. The company has also given order to place the roadbed in good shape for fall traffic, which promises to be unusually heavy.

The Katie Stockdale has been boarded up and converted into a large dance hall at Pittsburgh, and will be used for that purpose until the excursion season opens next summer. She has been permanently withdrawn from the Cincinnati and Pittsburgh trade.

Nearly all the members of the American Railway Union in Louisville have dropped out of that organization. The A. R. U. never was strong there, and the few members who were in the order were forced out. The other orders of trainmen are as strong as ever.

It is said the Ohio Falls Car Company will make little, if anything, on the 1,000 cars it is now building for the Pennsylvania Company. The cars are taken so low that the company is obliged to get labor very cheap in order to come out even, and laboring men are working at the rate of nine cents an hour.

The contractors on the Louisville and Jeffersonville Bridge announce that the work will be completed long before the 1st of January, the time set for its completion. So far no intimation has been given when the railroads in the deal with this bridge will begin running over the line, but the officers of the company seem confident of doing a good business as soon as the structure is completed. It's more than probable that the Big Four will be running over this bridge early in 1895.

Germany is very far advanced in the application of electricity, but they have had to come to this country for the best system of train lighting. W. S. Morris, Superintendent of Motive Power of the C. and O., has been called upon by electricians in Germany for a statement of cost of lighting the F. F. V. Limited and Washington Fast Line trains on that road, with storage system of electricity. The C. and O. is the only road lighting its trains with the storage system of electricity, and it has proved so successful that the attention of the world has been attracted to them.

The hull of the steamer Alice Dean, burned by General John Morgan July 8th, 1863, near Brandenburg, now lies in plain sight on the bar, about a quarter of a mile below that town. The Alice Dean belonged to the Cincinnati and Memphis Packet Company, and was commanded by Captain Pepper. When General Morgan and his 5,000 troopers reached the Ohio river on his raid into Indiana and Ohio, he captured the Alice Dean and the John T. McComb, the latter boat commanded by Captain Aaron Dallard, and compelled the officers to ferry his men over to Indiana.
